

RE: Request For Quotation (RFQ) Foothills Cemetery HydroVac Services

REQUEST FOR QUOTATION issued August 10, 2023

1.0 Questions from Proponents

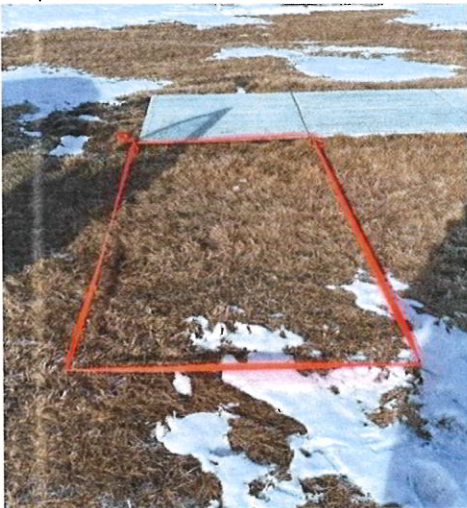

1.1 Is dig material able to be dumped on site?

All “dig” material must be disposed of offsite at an appropriate facility such as a landfill that can accept the material.

1.2 Can you provide clarity on how the dig area will be marked and or supervised?

The excavation site extent will be clearly marked by any combination pins and survey tape, spray paint, flags, or rope depending on the weather and/or ground conditions.

The hydrovac contractor is the designated prime contractor for the excavation site and required work zone for excavation operations.
